

AYUNTAMIENTO DE BÉDAR

# PUBLIC NOTICE

ÁNGEL COLLADO FERNÁNDEZ, MAYOR AND PRESIDENT OF  
THE BÉDAR TOWN HALL (ALMERÍA)

## ANNOUNCES :

That, with the arrival of winter and the consequent widespread use of fireplaces, stoves, and braziers for home heating, ash and embers are generated as combustion residue. If not properly managed, this residue poses a serious fire risk.

Therefore, and by virtue of the powers conferred upon me by current legislation, the following preventive measures are hereby **INFORMED AND WARNED**:

1. It is **PROHIBITED** to pour ash directly into containers, even if it appears cold. A smoldering ember can reignite and cause a fire hours after being deposited.
2. **MANDATORY COOLING**: Ashes must remain in a metal container, away from flammable materials, for at least 24-48 hours before disposal.
3. **VERIFICATION**: Before placing them in the trash (always in a sealed bag), ensure they are completely extinguished, preferably by dousing them with water.
4. **RESPONSIBILITY**: Failure to comply with these measures will result in fines and endangers public property, nearby vehicles, and the safety of residents.

Common sense and citizen cooperation are requested to prevent accidents.

In Bédar, on the date of electronic signature.

MAYOR-PRESIDENT
